

# Sagar Sawuck

Senior Full-Stack TypeScript Engineer — AI-Augmented Product Development

## PROFILE

Senior full-stack engineer, 10+ years across React/Next.js and Node (Express/Fastify/NestJS) with TypeScript end-to-end. Clean code advocate, motivated by impact, with a track record of taking ownership and lifting the teams around me.

- AI-augmented engineering:** shipped LLM agents into production UIs; daily flow with Cursor, GitHub Copilot, Claude Code (skills/plugins/MCP), LangChain and Vercel AI SDK
- Architecture & team enablement:** led platform builds, mentored backend devs into their first React production deployment, set CI/CD and code-quality standards
- Accessibility & performance:** WCAG 2.1 AA (EAA-aligned), Core Web Vitals, design systems and component libraries at scale
- Cross-functional communicator** with stakeholders, designers and backend teams — translates technical concepts clearly, AWS certified, long-term thinker

## EXPERIENCE

**Founder — SagaVortex** | sagarsys web solutions · JAN 2026 – PRESENT

Badhoevedorp, Netherlands · KVK 91451396

Running my own business across two tracks — product engineering and creative photography — shipping AI-augmented side projects while growing SagaVortex Art Photography into a full e-commerce print shop and photoshoot service.

- AI engineering practice:** built a deep-research agent on Vercel AI SDK (multi-step planning, tool use, synthesis); published a tech blog on sagarsys.net/blog
- Full-stack builds:** delivered Bengalivo end-to-end — WordPress → Next.js 15 redesign with custom admin CMS (Prisma + SQLite, Google OAuth), EN/NL i18n, SEO and Framer Motion animations; redesigned own portfolio sagarsys.net (Next.js 15, Tailwind 4) and tuned it to a Core Web Vitals score of 90+
- SagaVortex Art Photography:** launching e-commerce print shop and professional photoshoot services on sagavortex.art — designed the full customer store and journey on Squarespace; registered business since Oct 2023
- Business operations:** offer design, pricing, contracts, finance, marketing, customer experience — sharpens stakeholder fluency as an engineer

**Senior Frontend Consultant** (Software Specialist) — iO · JAN 2025 – DEC 2025

Amsterdam, Netherlands · Hybrid

Owned internal tooling for non-technical teams at iO end-to-end — discovery, design, build, ship — alongside client engagements, with a focus on AI-augmented interfaces.

- Shipped AI agents (LLMs) directly into UIs**, collapsing multi-step manual workflows into single chat interactions adopted by internal teams as day-to-day tooling
- Knowledge sharing:** spoke at iO Frontend Day — “Zod Returns: Your data will be validated!”; wrote “Frontend Automation with GitHub Actions and AWS” on iO Tech Hub; regular NL meetup and conference attendance

Tech & Skills React, Next.js, TypeScript, RTK Query, Zod, Vite, Vitest, Playwright, Storybook, Firebase, Node.js, NestJS, Tailwind CSS v4, Styled Components, Framer Motion, CSS3 Animations, GitHub Actions, LLMs / Agentic workflows, LangChain, Vercel AI SDK, Cursor, Claude Code (skills/plugins/MCP)

**Lead Frontend Developer — bol.com** · client project via iO · APR 2025 – SEP 2025

Utrecht, Netherlands · Hybrid

Architected and delivered a React platform enabling social-media creators to launch their bol.com affiliate storefronts — owning frontend solution architecture, developer experience, and the success of a backend-focused team shipping their first React product to production.

- Frontend solution architecture:** designed scalable architecture and set technical standards for the team
- Team enablement:** mentored backend developers into their first React production deployment via hands-on sessions, code reviews and pair programming
- CI/CD ownership:** built GitLab pipelines enforcing quality gates and automated deploys
- Cross-team collaboration:** partnered with the platform team on the first production rollout of the newly ported React component library
- UX iteration:** partnered with designers, ran alpha-user feedback loops, iterated to ship

Tech & Skills React, TypeScript, React Router, RTK Query, GraphQL, Frontend Solution Architecture, Design Systems, Storybook, GitLab CI, Cypress, Vitest

## EDUCATION

**BSc (Hons) Web & Multimedia Development**

University of Mauritius

2011 – 2015

Graduated with honours · final-year project: Android app + frontend website.

## SKILLS

**Languages** TypeScript, JavaScript, HTML, CSS · Java (familiar)

**Frontend** React, Next.js, Angular, Vue 3, Svelte

**Backend** Node.js, Express, NestJS, Fastify · Spring Boot (familiar)

**APIs** REST, GraphQL, OpenAPI / OAS, WebSocket

**AI Engineering** LLM integration, agentic workflows, prompt engineering, RAG · LangChain, Vercel AI SDK · Cursor, GitHub Copilot, Claude Code (skills, plugins, MCP)

**Testing** Jest, Vitest, Playwright, Cypress, Storybook

**Accessibility** WCAG 2.1 AA, accessible component patterns (EAA-aligned)

**Databases** PostgreSQL, MySQL, MongoDB, DynamoDB, Firebase · Prisma, Sequelize

**Cloud & DevOps** AWS, GCP, Docker, Kubernetes, Helm, GitHub Actions, GitLab CI, Jenkins

**Tooling** Git, Vite, Webpack, Framer Motion, npm / Yarn / pnpm

**Methodologies** Agile, Scrum, Kanban

## LANGUAGES

English Fluent (native)

French Fluent (native)

Dutch A2–B1 (improving)

EXPERIENCE (continued)

Frontend (Animations) — Philips Evnia · client project via iO · 2025

Amsterdam, Netherlands

Designed and shipped complex front-end animations for the Philips Evnia gaming monitor brand site (evnia.philips.nl) — closely matching the creative team’s vision while keeping the page performant.

- Built choreographed scroll and interaction animations combining **CSS3** and **Framer Motion**
- Tuned for performance on Core Web Vitals and cross-browser consistency

Tech & Skills React, TypeScript, CSS3 Animations, Framer Motion, Performance

Full-Stack JavaScript Developer — Talpa Network (Actievaardag)

· OCT 2022 – NOV 2024

Amsterdam, Netherlands · Hybrid

Senior React/Next.js engineer on Actievaardag — high-traffic e-commerce platform serving millions of users — focused on engagement, performance and developer productivity.

- Drove UX and performance improvements that increased user engagement
- Built REST APIs alongside frontend features for seamless full-stack integration
- Led React-version migrations and improved code maintainability
- Lifted team-wide developer experience (linting, testing, build tooling)

Tech & Skills React, Next.js, TypeScript, Jest, Redux, Node.js, Fastify, GitHub Actions, AWS, Docker, Kubernetes

Full-Stack Developer — Corel Corporation · AUG 2022 – OCT 2022

Mauritius / Remote

Contributed to MindManager — a large, complex mind-mapping codebase — working with distributed teams across multiple timezones, focused on UX optimisation and algorithmic problem-solving in core software.

Tech & Skills Vanilla JavaScript, Algorithms, UX optimisation, Complex software development

Senior React Developer — Providus Technologies · MAR 2021 – JUN 2022

Mauritius

Built a real-time virtual soccer betting platform serving **11 million users in Nigeria** — live updates, animated game simulations, large real-time datasets.

- Architected and shipped live match simulations driven by WebSocket
- Managed complex real-time data flows for high-concurrency usage
- Led React-version migrations and ongoing UI/UX + performance optimisation

Tech & Skills React, Redux, WebSocket, Webpack, Node.js, Firebase, GCP, Jenkins CI/CD

Software Developer — Maureva · JUN 2019 – DEC 2020

Ebene, Mauritius

Modernised a revenue accounting platform for airline providers — migrated legacy UIs to Angular and architected data-heavy interfaces in a cross-functional R&D team.

- Owned frontend project architecture and consulting (Angular)
- Designed reusable component library used across the product
- Collaborated with backend (Java/Spring Boot) on full-stack feature delivery

Tech & Skills Angular, RxJS, TypeScript, Component library design, Java (Spring Boot), AWS

CERTIFICATIONS & LEARNING

RECENT · 2025–2026

- Leading without Formal Authority — LinkedIn (Jun 2026)
- Leveraging Agentic AI in Cloud Computing: Strategy & Tool Optimization — LinkedIn (Apr 2026)
- AWS Technical Essentials — Amazon Web Services (Mar 2026)
- AI Agents Bootcamp — Frontmania (Oct 2025)
- Frontend Masters: Intro to Next.js v3, Intermediate React v5, Complete Intro to React v9 (Mar 2025); Website Accessibility v2, Introducing DevOps for Developers (Feb 2025)

IN PROGRESS

- AWS AI Practitioner
- LinkedIn Learning — AI, leadership & communication tracks

EARLIER

- Umbraco Certified Master (2017)
- AWS API Gateway with HTTP, Lambda, DynamoDB & iOS — Lynda.com (2018)

Writing on [sagarsys.net/blog](https://sagarsys.net/blog) and iO Tech Hub; regular NL meetup & conference attendance.

## EARLIER EXPERIENCE

---

### Senior Frontend Developer (Freelance) — Bitville Gaming · Mauritius · JAN – FEB 2021

Sports betting websites · React, Svelte, JavaScript

### Full-Stack Developer — BFast Systems · France / Remote · OCT 2018 – MAY 2019

Interactive kiosk applications with peripheral integrations (POS, ticket printers, QR scanners), deployment to remote devices, middleware integrations · Electron, Node.js, Express, Vue.js, Sequelize, MySQL, SQLite, MongoDB

### Senior Frontend Developer (Frontend Team Lead) — IPEDIS · Quatre-Bornes, Mauritius · SEP 2017 – SEP 2018

Led frontend on a document virtualisation platform with strong accessibility focus (PDF → interactive online annual reports for BNP Paribas, Nexity et al.) in close collaboration with the CTO · Angular, TypeScript, Accessibility (WCAG 2.1 AA), CSS3, HTML5, Symfony, Elasticsearch

### Frontend Developer (Acting Team Lead) — Proximity BBDO Indian Ocean · Quatre-Bornes, Mauritius · JUN 2016 – SEP 2017

Websites for P&G consumer brands and real-estate clients; Sitecore/Drupal theming; build-automation work · Vanilla JS, jQuery, CSS3/SASS, AngularJS, Gulp, Sitecore, .NET, Drupal

### Webmaster / Integrator / Developer — Webmarket · Tamarin, Mauritius · OCT 2015 – MAY 2016

Responsive frontend, custom WordPress themes and plugins

## SIDE PROJECTS

---

Hands-on technical practice — most open-source on [github.com/sagarsys](https://github.com/sagarsys).

### AI & AGENTIC BUILDS

- **vercel-ai-deep-research-chatbot** — Deep research chatbot built with Vercel AI SDK
- **ai-mood-journal** — AI journaling app surfacing mood insights (Next.js, React, TypeScript)

### FRAMEWORK PRACTICE

- **vue3-tvmaze** — Vue 3 + TypeScript TV discovery app on the TVMaze API
- **vue3-calculator** — Calculator (Vue 3, TypeScript, Vite)
- **react-music-player** — Music player (React, TypeScript)
- **react-feedback-popup** (*private*) — Reusable feedback-popup component (React, TypeScript)

### FULL-STACK

- **bengalivo-redesign** — Next.js 15 + Prisma redesign with custom admin CMS, OAuth, i18n, Framer Motion (see Founder section)
- **photography-booking-app** — Booking API for a photography business (Java, Spring Boot, REST API, React, TypeScript, Vite)
- **tomato-farm** — Supply-chain management app for tomato distribution (React, TypeScript, shadcn/ui, Tailwind)

### PERSONAL & BUSINESS

- **sagarsys.net** — Portfolio (Next.js 15, TypeScript, Tailwind 4, Framer Motion, Radix UI, GitHub API)
- **sagavortex** — Photography gallery (React, TypeScript, Material UI)
